

PAVALAN G

Full Stack Web Developer | MERN Stack Developer

Tamil Nadu, India, 620022 | Pavalanganesan2368@gmail.com | +91 9629157281 | LinkedIn: [Pavalan G](#) | GitHub: [Pavalanganesan2368](#)

PROFESSIONAL SUMMARY

Motivated Computer Science Engineering student (pursuing, expected 2027) with hands-on experience in Frontend and MERN Stack development. Proficient in building responsive, scalable web applications using React.js, Node.js, Express.js, and MongoDB. Completed a Frontend Developer internship, engaged in continuous self-directed learning, and independently built three full-stack projects covering authentication, RESTful API design, and data visualization. Seeking a Software Developer role to apply strong problem-solving skills while continuing to grow technically.

EDUCATION

B.E. Computer Science and Engineering — CGPA: 7.75

2024 – 2027

Government College of Engineering, Sethurappati, Trichy

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, Redux Toolkit Query, Tailwind CSS

Databases: MongoDB

Tools: VS Code, Git, GitHub, Postman, Vercel, Render

Core Concepts: JWT Authentication, RESTful API Design, CRUD Operations, Responsive UI Design, Deployment & Hosting

INTERNSHIP EXPERIENCE

Frontend Developer — Hilife.AI

August 2023 – September 2023

- Built responsive web applications using React.js, JavaScript, HTML5, and CSS3, ensuring cross-browser compatibility.
- Created reusable React components, improving code maintainability and reducing duplicate code across the app.
- Consumed REST APIs using Axios/Fetch to drive dynamic data rendering across multiple pages.
- Diagnosed and resolved frontend performance issues, improving page responsiveness.
- Collaborated with the team using Git and GitHub for version control and code reviews.

PROJECTS

Technotes Application | [Link](#) | [GitHub](#)

February 2026 – June 2026

- Architected a full-stack notes management application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented JWT authentication with role-based authorization to secure access across multiple user roles. Designed RESTful APIs to support full CRUD operations on notes.
- Integrated Redux Toolkit Query (RTK Query) for efficient client-side data fetching, caching, and state management.
- Built a user-friendly interface in React with real-time UI updates.

Fi-Pi Tracker Application | [Link](#) | [GitHub](#)

September 2025 – November 2025

- Developed a personal finance tracker with a React.js frontend and a Node.js/Express.js backend, using MongoDB for data storage.
- Secured user accounts through token-based sign-in and access control.
- Enabled complete CRUD functionality for managing income and expense entries across custom categories.
- Built an interactive dashboard to visualize spending trends and transaction history using charts. Styled a mobile-friendly interface with Tailwind CSS for a clean, intuitive experience.

Blog-Day Application | [Link](#) | [GitHub](#)

March 2025 – May 2025

- Built a full-stack blogging platform on the MERN stack, covering content creation, editing, and publishing workflows.
- Set up sign-in and access control using JSON Web Tokens to protect user sessions.
- Developed RESTful APIs supporting create, read, update, and delete operations on blog posts.
- Crafted a clean, intuitive interface with React for an improved reading and writing experience. Deployed both frontend and backend components to production for public access.
